Attachment 13

Inspector General's Recommendation Number 7b, page 71

Recommended DCI Action: Approve

Inspector General's Statement

Recommended that:

DCI issue instructions that Agency Regulations be further amended to make language proficiency testing, according to Agency standards, mandatory for all employees who are required to have language skill.

DD/P Comment

Concur. In practice we incline to go one step beyond this recommendation, and propose to require language testing of all Clandestine Service employees whose records reflect a claim of language capability. There is no other way in which we can have any real assurance of what our over all capability is and what further instruction, and in what languages, we require.
